Plug Power Inc. Analyst Notes

On May 13, 2014, shares of Plug Power Inc. (Plug Power) closed at \$4.09, up 4.87%. The trading volume for the session was 55.17 million, significantly higher than the previous day trading volume 20.37 million. According to The Street, during a presentation at the Wedbush 2014 Transformational Technologies Management Access Conference, the Company's management provided a full-year 2014 revenue guidance of \$70 million, which is \$5 million higher than Thomson Reuters' analyst anticipation. Additionally, the fuel cell Company expects to ship more than 3,000 units to 20 manufacturing or distribution facilities over the year and expects to achieve gross margins of 25% in 2014. T-Mobile US, Inc. Analyst Notes

On May 13, 2014, T-Mobile US, Inc. (T-Mobile) released the findings of a new survey of international travelers, which revealed an intense disparity between carrier customers who turn off their phones to avoid excesses and T-Mobile customers who travel with much more freedom and flexibility. According to T-Mobile's own customer data, T-Mobile customers travelling abroad now make three times more calls, text seven times more often, and use 28 times more data, while enjoying major savings as compared to carrier customers. John Legere, President and CEO, T-Mobile, said, "It's completely outrageous that old guard carriers are still raking in billions each year from these ridiculous roaming fees. That they continue to gouge their customers to the tune of 90 percent margins every time they set foot outside the country is shameful. Americans deserve better." The full analyst notes on T-Mobile are available to download free of charge at:

First Solar, Inc. Analyst Notes

On May 8, 2014, First Solar, Inc. (First Solar) and IXL Group of Companies (IXL) jointly announced the opening of IXL's new structure manufacturing plant in Adelaide. According to First Solar, the facility will enable IXL to assemble and deliver the mounting structures for the former's 155 MW utility-scale solar photovoltaic projects at Nyngan and Broken Hill in New South Wales. First Solar expects the plant to create around 40 jobs as a part of its commitment to support Australian manufacturers. Jack Curtis, First Solar's Vice President of Business Development for Asia Pacific, said, "As the solar industry continues to grow in Australia, there will be an increasing need and demand for a reliable and efficient local supplier base. Continued utilisation of local suppliers will not only reduce the cost of delivering solar power to Australia, but it will also create local jobs, develop regional skills and support more sustainable employment." The full analyst notes on First Solar are available to download free of charge at:
